SARA SLACK

TODAY'S GOALS

- Understand QR codes- we want you to leave with something you can use!
- Elementary specific examples, but can be applied to other grade levels or specialties
- Share ideas for more applications in classroom
- Time to practice creating own QR codes

WHAT ARE QR CODES?

- The QR (quick response) code is a 2 dimensional barcode
- They can be scanned by devices with a camera and QR reader (application) installed
- QR codes link to websites, videos, images, text, recordings, ...

WHY USE QR CODES?

- Engaging and fun
- Saves time- they're quick!
- Easy to make
- Can record voice and easily play back
- Free!
- Can address speaking and listening standards easily

TRY IT OUT!

- 6 ipad “stations” to try out easy QR creations-
example of classroom creations for or by students
- Other ways you can use QR codes in your
classroom?

TIME TO CREATE!

- #1- QR Creator- there are many free QR creators
 - qrstuff.com for youtube links, website url's, text, ...
 - vocaroo.com for voice recordings
- #2- QR Scanner- there are many free QR scanners you can download at the App Store on your device
 - Qrafter or QRReader
