

# GET THE FACTS

## ABOUT THE UPCOMING BOND ELECTION

### Baldwin USD 348 is Proposing a \$25 Million Bond Election to Fund:

#### Learning, Career & Technical Education

- Flexible space so that our teachers can easily adapt to different learning styles, including more small group, hands-on and personalized learning
- A Career Technical Education Center that provides our students with real-world learning and exposure to different career options
- Bringing our high school and other facilities up-to-date with today's technology

#### Safety, Security & Protecting Our District's Investments in Students

- Adjoining our high school and CTE building so that students are not leaving buildings unsupervised to get to their next class
- Improving parking and traffic flow for Intermediate Center drop-off and pick-up
- More parking and increased circulation for the high school and junior high
- Establishing PE locker rooms connected to the high school gym to ensure safety and supervision
- Bringing our facilities up to par with neighboring districts so we can protect the community's investment in our schools and protect our local enrollment for years to come under the state's new "open enrollment" law

#### Field & Track Improvements for More Student Access

- Bringing our track up to regulation so our students can have meets at home
- Adding seating so that families and the community have a spot to cheer on our Bulldogs
- Installing lights so we can host evening events - like senior night and football/soccer games - that parents can attend without having to take off work or canceling junior varsity opportunities due to lack of daylight
- Installing turf so we can make the most efficient use of the field, allowing it to be usable in wet or dry conditions for games, band and PE classes, grade school field days, and Recreation Commission activities

#### FINANCIAL IMPACT

Project Cost:	\$25,000,000
